FEATURES & BENEFITS

- Wireless remote control with 2 speed options - High and Low
- Carrier Air Curtain uses centrifugal air flow technology
- Centrifugal turbine produces high volume of air stream that provides strong air barrier against infiltration of dust, insects and unconditioned air.
- High performance with low noise steady motor
- Full Aluminum body that doesn't get rusty or discoloured
- Unique, elegant, arc-shape design with no visible screws suitable for modern offices, luxurious establishments, supermarket chains and airport terminals
- Easy to install with low maintenance life
- Installation height: 3-4m
- Also available in Brown, Red and Silver
